# SMW-AUTOBLOK worldwide leader in Steady Rests

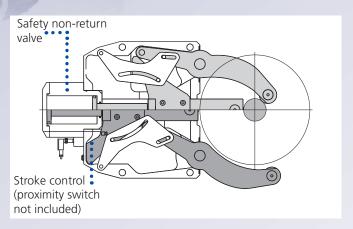

#### Fixed or travelling application

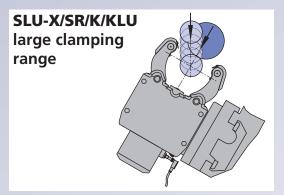

- 1. Tandem Steady Rest fixed
- **2.** Steady Rest fixed for end machining
- 3. Steady Rest travelling

### Features included in standard range

**SLUA-X/SRA** additional pivoting upper arm for automatic vertical loading (worldwide patented)

#### SLU-X® SLUA®-B SRA **SLU-B**

## KLU

#### **Equipment**

#### Option of manual lubrication (M)

- Low cost solution for medium working conditions and low build up of swarf.
- The lubrication points and rollers are supplied with lubrication grease via the grease nipples and the grease gun.
- Lubrication intervals depending on the working conditions normally every 4 to 8 operating hours.
- Grease: KPE 2R-20 DIN 51502

#### Option of central oil lubrication (Z)

- For heavy working conditions and high build up of swarf
- For travelling Steady Rest applications.
- The use of our separate complete lubrication unit with timer control is recommended.
- Lubricating intervals 5 20 min
- Min./max. operating pressure 10 to 45 bar.
- Oil: Viscosity of 46 mm<sup>2</sup>/s (viscosity class ISO)

#### Option of central lubrication oil + air (OLD)

- For heaviest cutting conditions with high built up of swarf, dust or coolant.
- The SMW-AUTOBLOK oil + air unit for lubrication with built-in timer control is mandatory.
- This unit injects oil for lubrication into the air hose in adjustable intervals (2 -12 min.).
- The permanent air flow (min. 3 bar) feeds the oil to the rollers and keeps them clean.
- Oil: Viscosity of 46 mm<sup>2</sup>/s (viscosity class ISO)

#### Option of central grease lubrication (F)

- For machines with central grease lubrication
- For application and intervals please follow the instruction of the machine maker.
- Min./max. operating pressure 30 to 45 bar.
- Grease: NLGI class 0 or 1

#### **Option of rollers**

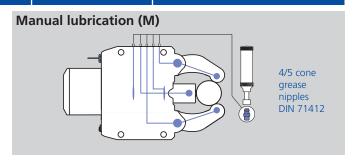

- SMW-AUTOBLOK rollers (precision class P05) specially developed for our Steady Rests.
- Special sealing ensures highest precision and service life.
- Standard equipment: 1 set of cylindrical rollers.
- Option: Spherical rollers (for travelling Steady Rests), synthetic material rollers, carbide rollers.

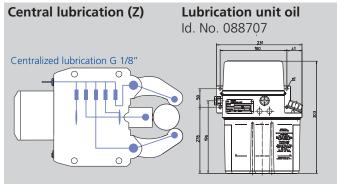

#### Rollers (all types)

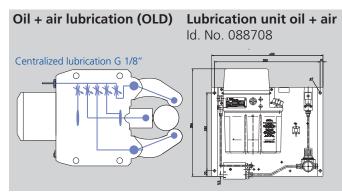

• Rollers steel (standard): Surface of workpiece not hardened

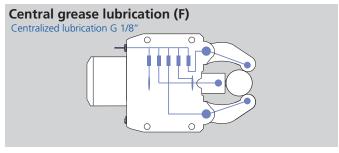

#### Available optional materials:

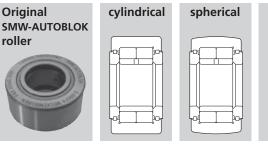

- Rollers synthetic material: Surface of workpiece polished or chrome plated
- Rollers carbide: Surface of workpiece hardened

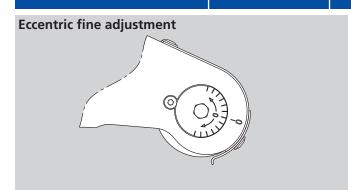

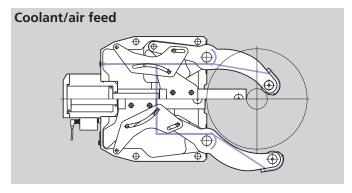

narrow

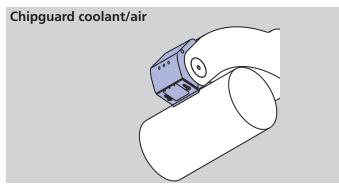

#### Option fine adjustment of center line

- Eccentric roller pins on the two Steady Rest arms allow a quick fine adjustment of the center line.
- This avoids to unlock and adjust the entire Steady Rest on the bracket for small adjusting movements.
- Adjustment of open steady rest only!

#### Coolant/air feed (SR/K/KLU only)

- Built-in channels to feed coolant or air from a central connecting port to the Steady Rest arms.
- Basic equipment for SR/K/KLU steady rests
- From size SR-4 / K4 and larger with coolant through the center arm

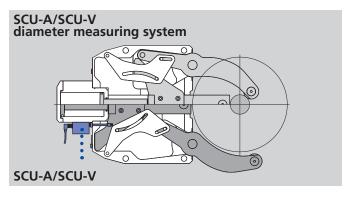

#### Patented coolant/air chipguard with integrated flush nozzles (SR/K/KLU only)

- Keeps roller clamping area free from chips
- The patented double flush nozzles keep front and rear of the wiper area clean.

#### Only for steady rests with coolant / air feed. Benefit:

- Constant centering accuracy
- No damage of workpiece and rollers caused by chips/swarf
- Less roller consumption = less costs

#### Option linear diameter measuring system SCU-A/SCU-V

- The position of the clamping arms is monitored by the linear measuring system SCU-A/SCU-V.
- Avoids collision with workpieces, turret, loader etc.
- Reduced cycle time due to position controlled opening of the arms to the requested opening only.

SCU-A: In: 24 V Out: 4 - 20 mA In: 24 V SCU-V: Out: 0 - 10 V

# Steady Rest bracket with adjustment device

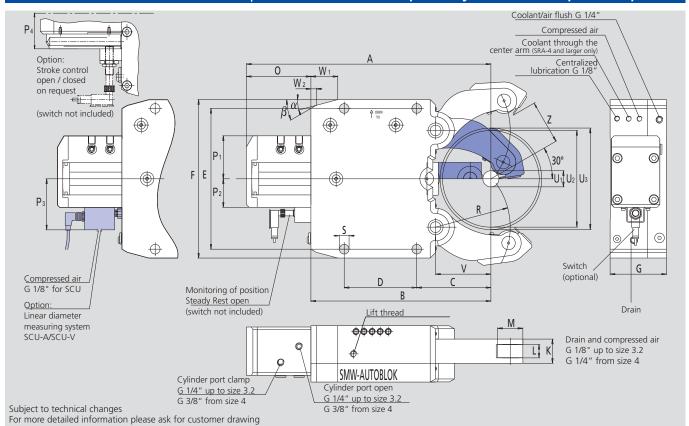

#### **Steady Rest bracket**

- A perfect bracket is very important for the function/precision of the Steady Rest.
- Fast and easy adjustment can be done with the SMW-AUTOBLOK adjustment device integrated into the bracket.
- SMW-AUTOBLOK supplies the correct bracket for all applications as a turnkey solution.

**Self-centering Steady Rests Premium Line** 

#### Additional pivoting upper arm for vertical loading

- Sealed body
- Integrated coolant flush
- Chip guard with coolant nozzles
   Stroke control unit or proximity switch for end position open
